

Westin St. Maarten goes green

Thursday, 05 March 2009

The Westin Dawn Beach Resort & Spa in St. Maarten made the decision to green.

Zager Plumbing & Solar, Inc from Deerfield Beach, FL was contracted to design and install the solar project. The system will provide the hot water for the 317 guest rooms, restaurants, laundry facilities, spa and restrooms.

The resort will reduce costs and consumption of Liquid Petroleum Gas (LPG). The panels will be mounted on top of the The Westin parking garage.
